

v3k_nowing_each_other

v3k:nowing each other for 2 or more people

Instruments:

- everybody brings a selection of sound objects/instruments which are then pooled and shared with the whole group.

Performance Instructions:

[before the performance]

1. Visit www.setosa.io/ev/markov-chains/ and learn about Markov Chains.

2. One player performs a solo (improvised or prepared) using the shared instruments. The rest of the group constructs a Markov Chain diagram representing the performers actions.

3. This process should be repeated so that one diagram is made for each performer.

[for the final performance]

4. Each player should perform following behavioral patterns outlined in the Markov Chain diagram of another group member. This can be done solo, in small and/or large groupings for an amount of time decided before the concert.
